SUMMARY

Software Engineer and Web & Mobile Developer specializing in building responsive web applications using React and JavaScript, and cross-platform mobile applications using Dart and Flutter. Experienced in developing user-focused interfaces, implementing responsive designs, integrating APIs, and building functional application features across web and mobile platforms. Skilled in UI/UX design, Git, GitHub, and modern software development practices.

SKILLS

Technical Skills: Flutter | React | JavaScript & TypeScript | Node.js & Express.js | Git & GitHub | HTML & CSS | UI/UX Design

Communication Skills: Team Collaboration | Excellent Communication | Adaptability

Development Skills: Debugging | Problem Solving | Fast Learning

PROJECTS

My Portfolio (Web Application), *React, TypeScript, JavaScript, CSS.* **05/2026 – Present**

- I developed my personal resume website using React, TypeScript, JavaScript, and CSS.
- I incorporated everything I know and have learned in the field of web development, whether from my university studies or other external learning. [Link](#) 🔗

Balagh Jo || Graduate Project || Jordan University of Science and Technology, **04/2026 – Present**
Flutter, Node.js & Express.js, MongoDB.

- An application primarily aimed at citizens to report problems to the Irbid Municipality such as potholes in the street, broken lights, or accumulated waste.
- I was responsible for converting the application design into actual user interface code using the Dart programming language, ensuring the code was clean and implementable. [Github](#) 🔗 [APK Link](#) 🔗

Time Tracer (Web Application), *React, JavaScript.* **08/2026 – 08/2026**

- See where your day actually goes.
- TimeTrace is a small, simple time awareness tool for students. Record what you did and for how long, and TimeTrace turns it into a timeline, a category breakdown, and a few plain-language reflections all from data that never leaves your browser. [Try it!](#) 🔗

My University Projects, *C#, HTML, JS.* **10/2024 – 01/2025**

- Some of my simple projects that I worked on during my university studies, more than one project and more than one programming languages. [Github](#) 🔗

Memory Vault (Web Application), *React (JavaScript), Vite5, CSS3.* **08/2025 – 09/2025**

- An interactive digital museum built as a frontend project.
- It explores the cultural and emotional significance of ordinary objects from cassette players and rotary phones to school notebooks and vintage radios through visually appealing collections and detailed stories. [Try it!](#) 🔗

EDUCATION

B.Sc. in Software Engineering, *Jordan University of Science and Technology* **2022 – 2026**
(Very Good)
